

STAGECOUNTER®

STAGE CONTROL
TOOL

STAGECOUNTER® is an application designed for quantitative analysis of any kind of material.

- The system allows the definition of the constituents names to be quantified;
- The material composition quantification is achieved through the utilization of the automatic STAGEEDGE®, a point-counting stage connected to a polarized microscope and controlled by the computer;
- Optimizes and reduces time spent on quantification;
- Quantitative analysis can be exported to a Microsoft Excel® file;
- Touch screen ready;
- Fully integrated with STAGEEDGE® microscope stage.

Only available on the acquisition of STAGEEDGE® Pack.
